The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 26-28 and 31-33 are rejected under 35 U.S.C. 102(e) as being anticipated by Chen et al. (US 7,038,230 B2).

Chen et al. disclose a phase change memory structure comprising:
a substrate comprising a conductive area, wherein the conductive area includes bottom electrodes 10 (Figs. 4a, 4b); a spacer 30 comprising a phase changing material sensitive to temperature and having a partially exposed sidewall region at the spacer upper portion defining a contact area, said contact area comprising an upward sloping positive radius of curvature (Fig. 9C); and an upper conductive electrode 40 on said

contact area (Fig. 9C); wherein a spacer bottom portion partially overlaps the conductive area and said upper conductive electrode at least partially overlaps said contact area (Fig. 9b).

The upper conductive electrode comprises W (col. 8, lines 7-14).

The phase changing material comprises a chalcogenide (col. 7, lines 27-33).

The chalcogenide comprises a material selected from the group consisting of Ge, Te, and Sb and their alloy system (col. 7, lines 27-33).
